# About Us

Policy Research Foundation (PRF), New Delhi, was established by a group of academics, economists, businessmen, policymakers, and bureaucrats to conduct data-based policy analysis and policy-making contributions. PRF became operational in December 2019 to enrich the content of information/data in ideological discussions and arguments. In addition to improving policy proposals, we help our ideas come to life through concrete projects.

Policy Research Foundation primarily works on policies related to Sustainable Development Goals 2030. It works in close coordination with other Government and Non-Government organizations. The main strategies of our foundation are building greater research capacity, achieving research excellence in fields of national importance, creating a supportive environment for research, and disseminating knowledge by promoting academic research.

PRF brings experts in various fields along with participants to the implementation process to achieve visible, effective, and durable outcomes.

# Mission

1. PRF is dedicated to enhancing social and economic research support to scholars and public agencies for academic, service, and educational activities.
2. PRF is committed to conducting original survey research, data collection & analysis which helps in the process of better decision-making and development of public policies.

# Vision

1. To create an ambiance in which new ideas, skills, innovation, and research are promoted & from which the leaders and innovators of tomorrow emerge.
2. To collaborate with other academic and research institutes around the world to strengthen the research and training ecosystem.

# Founder's Message

**LALIT DAGAR**  
Founder  
Policy Research Foundation

A non-profitable charitable trust, Policy Research Foundation (PRF) came into existence in 2019, as an organization that undertakes research in various socio-economic fields for sustainable growth and to establish cooperation with agencies, institutions, and research centers at regional, national, and global levels. PRF conducts activities that create awareness and signify the importance of research in the formulation, development, and implementation of socio-economic policies. The main strategies of our foundation are building greater research capacity; achieving research excellence in fields of national importance; creating a supportive environment for research; and disseminating knowledge by promoting academic research.

PRF aims to create and promote a culture of original and independent research with a focus on policies regarding the sustainable development of society. We not only wish to provide a platform for researchers but also examine the applicability of policies on the ground. To aid the same, we intend to form a network of research institutes and organizations. We aim to raise awareness through a multi-pronged approach; through digital mediums, such as webinars; by organizing public lectures, debates, and seminars; through one-on-one campaigns as well. Our objectives are only to create a well-informed public, find feasible solutions for the issues that plague our society as well as equip the people with the tools to access these solutions. To achieve our goals, we range from providing capacity-building training to undertaking specialized research, to establishing and managing educational institutions for various disciplines. We aspire to create an impact on the leaders and innovators of today and tomorrow.
